

MOGAMAT SHUHAIR SMITH

FULL-STACK WEB DEVELOPER

Cape Town, South Africa | 074 786 2736 | suhairsmith17@gmail.com

LinkedIn: [linkedin.com/in/suhair-smith-kxngzero329](https://www.linkedin.com/in/suhair-smith-kxngzero329) | Portfolio: msmithfolio.netlify.app

PROFESSIONAL PROFILE

Junior-to-intermediate full-stack developer with four years of formal web-development training and hands-on delivery experience across responsive web applications, e-commerce platforms, booking systems, administrative dashboards and HR systems. Comfortable working across front-end, back-end and database layers using React.js, Typescript, Vue.js, Node.js, PHP, MySQL and PostgreSQL. Brings a practical mix of coding, requirements analysis, technical planning, troubleshooting and stakeholder communication, with a strong focus on maintainable, secure and user-friendly solutions.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, PHP, Python, C#, Typescript

Frontend: React.js, Vue.js, Bootstrap, Typescript, responsive and mobile-first web design

Backend: Node.js, Microsoft ASP.NET, authentication and authorization

Databases & Platforms: MySQL, MongoDB, Supabase, Firebase, PostgreSQL

Deployment & Hosting: Netlify, Vercel, Render, GitHub Pages, FileZilla, InfinityFree, Xneelo, HostAfrica, GoDaddy

PROFESSIONAL EXPERIENCE

Lead Full-Stack Developer & Technical Delivery Manager | NexWebSA (PTY) LTD | Cape Town | February 2026 - Present

- Lead the end-to-end delivery of custom web applications, business platforms, booking systems and administrative dashboards, from requirements and technical planning through development and client handover.
- Develop and maintain front-end and back-end functionality, translating business needs into responsive, maintainable solutions with dependable data flows and clear user journeys.
- Coordinate developers and project stakeholders, clarify requirements, troubleshoot defects and keep technical execution aligned with scope and business objectives.
- Apply consistent quality, security, performance and reliability standards across solution design and delivery.

Junior Software Developer Intern | Life Choices Studio | Lansdowne | September 2025 - August 2026

- Develop and maintain web-application features in a practical studio environment, applying front-end, back-end and database concepts to real-world delivery tasks.
- Collaborate with developers and project stakeholders to interpret requirements, troubleshoot issues and deliver clean, maintainable code as part of a team workflow.

SELECTED PROJECT EXPERIENCE

Halo Boutique E-Commerce Store | Freelancing Client | August 2026

Technologies: React.js - Typescript, PostgreSQL, Supabase DB, Tailwindcss

- Designed and developed a responsive e-commerce experience that showcases fashion and accessories products and supports the online purchasing journey across screen sizes.
- Implemented user authentication for Admin Panel and Whatsapp order system to strengthen account security and support a smoother checkout experience.

Modern Tech Solutions HR System Project Module | Life Choices Academy | July 2025 - August 2025

Technologies: PHP, MySQL

- Built a database-driven Human Resource Management System for employee records, leave processing and administrative reporting.
- Automated leave approvals and employee-record updates, reducing repetitive manual administration and improving information consistency.
